

ADVACIP

ADVACIP is a surfactant blend that enhances cleaning efficiency of washing operations such as bottle washing, CIP and other equipment cleaning.

- Contains special sequestering agents that increase effectiveness of cleaning products
- Lowers the effect of water ions present in the process water such as Fe, Ca, Mg, Si, Cl to give way to an effective cleaning
- Acts as a detergent builder

General use instruction:

Charge at 0.2 – 1% with water, depending on the degree and nature of soil to be removed.

Incorporate ADVACIP during the alkali wash step.

*For specific dilution or application, please consult Kalinisan Chemicals representative.

*Available in:

Carbouy
